EXPERIENCES

- (2016) Intern, PT. Bukit Asam, Tbk. Unit Pelabuhan Tarahan, Lampung**
Single-handedly developed a web application namely SI Mitra PBTA by utilizing native PHP technology. A system for Corporate Social Responsibility program which was meant to replace the company's existing system due to the lack of features such as security, integration, etc.
- (2016-2018) Part-time and Remote IT Staff, Akademi Ilmu Komputer Ternate**
Handled maintenance of Personal Computers in Computer Laboratory including installing software, running diagnostics, etc. and handled the development of the academy's website along with other IT staff.
- (2019 - 2020) Full-Stack Web Developer, Indonesia Mengajar, Jakarta**
Handled various aspects of IT in the organization from managing IT services and infrastructures up to developing the organization's official website with customized content management system and an advanced recruitment which has multiple roles including candidates, assessors, and admins. The system was actively used by more than 7000 users in early 2020.
- (2020 - Now) Full-Stack Programmer, Bank Rakyat Indonesia, Jakarta**
Work as a Full-Stack Programmer within a team that is focused on a business product (Internet Banking Business) and involved in various activities such as planning, analysis, development, and implementation. Proven to be effective in given tasks, delivered quality codes, involved in providing solutions to business and technical needs. Used PHP (Laravel, CI, Lumen), C#, and JavaScript programming language and learned new things such as CI/CD, DevOps tools, collaboration tools, Go Lang., RabbitMQ, etc.
